Notes

Sights

The front sight only option is for those who want a certain cosmetic look to their rifle but do not plan to use iron sights.

The end user can opt to buy no sights.

The front and rear sight option is a drum dioptre style sight similar to the iron sights used on the HK416. They are not adjustable for elevation and have a zero of about 50 meters. They are adjustable for windage. These sights will form a lower third co-witness with the Advanced Reflex Optic or any optic that has a true co-witness with an AR-15.

Trigger Group

The No Trigger Group option is for users that want to buy a high end trigger group. Specter Arms offers regular and improved triggers but no ultra-light target triggers. Users wanting to save some money and get a light target trigger can opt out of the cost of buying one from Specter Arms.

Stocks

The fixed stock has a length of pull of 36cm and tends to fit a person taller than 175 cm.

The wire stock is not collapsible or adjustable. It has a length of pull of 31 cm and tends to fit a person 155 cm to 190 cm tall.

Removing the stock or replacing the stock with anything that reduces the overall length to less than 66cm makes this firearm restricted. It is the responsibility of the end user to register the S2 as a restricted firearm if the end user modifies the firearm to be less than 66cm in overall length.

Payment

Currently Specter Arms only accepts Money Orders and Cheques.

Allow for 3 working days to process Money Orders.

Allow 4 weeks to process Cheques.

Legal

A copy of your PAL must be sent before Specter Arms will ship the S2 Rifle.

Specter Arms only ships rifles to Canada.
